COMMERCIAL AND DELIVERY PROPOSAL

Gemini Enterprise Hands-On Training Programme

Samsung Electronics · Spain and Portugal

September - November 2026

Confidential document · Commercial and scope proposal

We drive business with data and AI

EXECUTIVE SUMMARY

A complete programme to turn Gemini into everyday productivity

PRAXCV proposes a practical, in-person programme tailored to the real responsibilities of Samsung Electronics Iberia teams. The objective is to help participants incorporate Gemini Enterprise into their daily work safely and effectively, with particular emphasis on prompting, information analysis, reporting and actionable business outputs.

391	25	50 h	7	2
participants	in-person sessions	net training	professional journeys	trainers

This proposal is not the repetition of one standard course 25 times. It combines a reusable common foundation, seven professional journeys, level-based adaptation, bilingual materials and coordinated delivery in Spain and Portugal.

What the project includes

PRAXCV takes full responsibility for the design, production, delivery and evaluation of the programme. Samsung does not need to develop content or select every module in advance for the project to move forward.

- Foundations, Prompting and AI for reporting.
- Department-specific hands-on practice for all seven professional areas.
- Complete materials, exercises, prompts, guides and deliverables.
- In-person delivery by two trainers and final evaluation.

PROGRAMME SCOPE

Common two-hour session architecture

PRAXCV takes full responsibility for the design, production, delivery and evaluation of the programme. Samsung does not need to develop content or select every module in advance for the project to move forward.

10 min	15 min	20 min	65 min	10 min
Foundations	Prompting	AI for reporting	Department hands-on	Closing and habit

Seven tailored professional journeys

Area	Recommended focus	Expected outputs
Finance	Closing analysis, deviations, forecasting and financial reporting.	Verified findings and executive narratives.
HR	Internal communication, onboarding, surveys and responsible information use.	Clearer materials and more consistent processes.
Legal Affairs	Document comparison, preliminary review and verification controls.	Better synthesis without replacing legal validation.
Marketing	Market and competitor analysis, launches, communication, ROI and post-mortems.	Decision-oriented plans and reporting.
QA & CS	Incident patterns, escalation, processes and quality reporting.	Structured responses and trend identification.
Sales	Account plans, account-level competitive analysis and action ROI.	Priorities, next steps and executive follow-up.
SCM & Logistics	Operational data, KPIs, anomalies, cause hypotheses and actions.	Analytical reporting and operational prioritisation.

PRAXCV will define a recommended configuration for each area. If Samsung would like to explore a specific use case, it may be shared by email over the coming days or weeks (always at least 3 weeks before the start of the relevant session) and it will be incorporated if compatible with scope, available time and confidentiality requirements.

LEARNING ADAPTATION

Two facilitation levels at no additional cost

Samsung may identify (or not), within each department, which participants require a more guided approach and which can work with greater autonomy. PRAXCV will adapt pace, materials and difficulty so that all groups progress from an appropriate starting point.

Foundational level	Intermediate-advanced level
Step-by-step demonstrations and greater trainer support.	Fewer closed instructions and greater autonomy.
Partially structured prompts and guided templates.	Multi-stage prompts and comparison of alternatives.
Lower-complexity exercises focused on essential concepts.	More demanding analysis, advanced verification and executive outputs.
Progressive pace and intensive support from both trainers.	Greater depth and work focused on decision-making.

Optional participant-level questionnaire

Once the proposal is approved, PRAXCV will provide Samsung, if considered useful, with a short non-evaluative questionnaire to support participant classification. Samsung may use the questionnaire results or assign levels directly based on its knowledge of the teams. The questionnaire will not be used for individual performance assessment.

Level adaptation, preparation of variants and the questionnaire are included at no additional cost to Samsung.

Application principles

- The essential objectives and content will remain equivalent across groups.
- Pace, guidance, complexity and autonomy will be adapted.
- Level identification will be used only to improve the learning experience.
- The two trainers will support practical work and different learning speeds.

Complete content development by PRAXCV

The programme combines efficient reuse with genuine customisation. Common blocks are developed once and adapted across groups, while cases, exercises, prompts and datasets are designed for each of the seven professional areas.

Instructional design Two-hour architecture, facilitator script, demonstrations and practical dynamics.	**Seven journeys** Area-specific cases, exercises and expected business outputs.
Level adaptation Guided and advanced variants without unnecessary duplication.	**Bilingual materials** Complete Spanish content for Spain and English content for Portugal.
Testing and quality assurance Validation of prompts, datasets, exercises and demonstrations before delivery.	**Use-case flexibility** Incorporation of Samsung use cases when received with sufficient lead time.

In-person rollout in Madrid and Portugal

Spain · Madrid 321 participants · 21 sessions · 7 recommended days · 3 two-hour sessions per day.	**Portugal** 70 participants · 4 sessions · one intensive day · travel and logistics included.

- Two PRAXCV trainers will be present in every session.
- Spain sessions will be delivered in Spanish and Portugal sessions in English.
- The planned calendar runs from September to November 2026.
- The proposal includes session coordination, advance preparation and group-level material adjustments.

Materials and deliverables included

- Complete facilitator presentation and delivery script.
- Practical exercises and fictional, public or anonymised datasets.
- Prompt library tailored to each professional area.
- Quick guide to prompting, reporting and verification.
- Spanish and English materials for all participants.
- Satisfaction survey and final recommendations report.

DIFFERENTIATING VALUE

Why this is not a standard training course

Seven tailored journeys Each area works with different objectives, examples and outputs.	**Level-based adaptation** Samsung may organise foundational or intermediate-advanced groups at no extra cost.
Full programme production PRAXCV designs, tests, translates and delivers all content and resources.	**Two trainers and two countries** Practical support, coordination and international delivery are included.

Fixed commercial proposal

The investment is presented as a fixed project fee covering programme design, customisation, materials production, delivery, coordination, final evaluation and the complete Portugal deployment.

Commercial component	Amount
Programme design and customisation for seven professional areas	€14,500
Level adaptation, bilingual materials and practical resources	€7,000
Delivery of 25 in-person sessions by two trainers	€10,500
Coordination, final report and Portugal deployment	€3,000
Subtotal	**€35,000**
VAT (21%)	€7,350
Total including VAT	**€42,350**

The amount includes the travel, accommodation, meals and local transport required for the Portugal delivery day. It does not include ongoing post-programme support or additional consulting phases, which would be quoted separately if Samsung decides to extend the programme.

NEXT STEPS

How the programme will progress after approval

1	2	3	4	5
Approval	**Levels**	**Use cases**	**Production**	**Delivery**
Formal confirmation of the commercial proposal.	Optional questionnaire and group classification.	Receipt of any Samsung priorities to incorporate.	Development and validation of materials, exercises and prompts.	Execution of the 25 sessions and final report delivery.

PRAXCV is committed to delivering training that is clear, useful and adapted to the reality of each team. The goal is not only for participants to understand Gemini Enterprise, but to incorporate it into everyday work with judgement, safety and tangible business value.

We remain available to clarify any aspect of the proposal and to begin detailed programme preparation once it has been approved.
